## Subject index

### Volume 98 (1997)

**age-1**; Brain; *clk-1*; Phosphatidyl inositol 3-OH kinase (PI3K); Signal transduction; Transcriptional silencer 98, 223

**Ageing**; Chromosomal instability; DNA helicase; Progeroid syndrome; System; Werner's syndrome 98, 239

**Age-retarding**; Physiology; Longevity 98, 47

**Aging**; DNA repair; Transgenic mice; Quantitative extended-length PCR; Mitochondrial DNA damage 98, 203

**Aging**; Erythrocyte; Oxidative damage; Malondialdehyde;  $\text{Ca}^{2+}$ -ATPase; Chemiluminescence 98, 127

**Aging**; Founder chromosome; Helicase; Progeria; Werner syndrome 98, 255

**Aging**; Free radicals; Mitochondria; Longevity; Heart; Hydrogen peroxide 98, 95

**Aging**; Glutathione; Glutathione peroxidase; superoxide dismutase; lipid peroxidation 98, 177

**Aging**; Human T cells; Protein tyrosine kinases; T cell receptor signaling; Protein tyrosine phosphatases 98, 57

**Aging impairment reversibility**; Endocrine thymus; Brain insulin receptors; Mouse 98, 37

**Aging**; Kininogen; Cysteine proteinase inhibitors; Rat liver 98, 151

**Aging**; Longevity; Mortality rate; Very advanced age 98, 167

**Aging**; Osteoblast; Bone formation; Fibronectin; Oxygen free radical 98, 113

**Aging**; Mutation; Transgenic Mice 98, 189

**Bone formation**; Aging; Osteoblast; Fibronectin; Oxygen free radical 98, 113

**Brain**; *age-1*; *clk-1*; Phosphatidyl inositol 3-OH kinase (PI3K); Signal transduction; Transcriptional silencer 98, 223

**Brain insulin receptors**; Endocrine thymus; Aging impairment reversibility; Mouse 98, 37

**$\text{Ca}^{2+}$ -ATPase**; Aging; Erythrocyte; Oxidative damage; Malondialdehyde; Chemiluminescence 98, 127

***Campylobacter rectus***; In vitro aging; Interleukin- $1\beta$ ; Prostaglandin  $\text{E}_2$ ; Lipopolysaccharide; Fibroblasts 98, 75

**Carbenoxolone**; Mineralocorticoid receptors; Glucocorticoid receptors; Corticosterone; Steroid metabolism; Intestinal maturation;  $11\beta$ -Hydroxysteroid dehydrogenase 98, 139

**Chemiluminescence**; Aging; Erythrocyte; Oxidative damage; Malondialdehyde;  $\text{Ca}^{2+}$ -ATPase 98, 127

**Chromosomal instability**; Ageing; DNA helicase; Progeroid syndrome; System; Werner's syndrome 98, 239

- clk-1; age-1**; Brain; Phosphatidyl inositol 3-OH kinase (PI3K); Signal transduction; Transcriptional silencer 98, 223
- Corticosterone**; Mineralocorticoid receptors; Glucocorticoid receptors; Steroid metabolism; Intestinal maturation; 11 $\beta$ -Hydroxysteroid dehydrogenase; Carbenoxolone 98, 139
- Cysteine proteinase inhibitors**; Kininogen; Aging; Rat liver 98, 151
- DNA helicase**; Ageing; Chromosomal instability; Progeroid syndrome; System; Werner's syndrome 98, 239
- DNA repair**; Transgenic mice; Quantitative extended-length PCR; Mitochondrial DNA damage; Aging 98, 203
- Endocrine thymus**; Aging impairment reversibility; Brain insulin receptors; Mouse 98, 37
- Erythrocyte**; Aging; Oxidative damage; Malondialdehyde; Ca<sup>2+</sup>-ATPase; Chemiluminescence 98, 127
- Fibroblasts**; In vitro aging; Interleukin-1 $\beta$ ; Prostaglandin E<sub>2</sub>; *Campylobacter rectus*; Lipopolysaccharide 98, 75
- Fibronectin**; Aging; Osteoblast; Bone formation; Oxygen free radical 98, 113
- Founder chromosome**; Aging; Helicase; Progeria; Werner syndrome 98, 255
- Free radicals**; Mitochondria; Aging; Longevity; Heart; Hydrogen peroxide 98, 95
- Glucocorticoid receptors**; Mineralocorticoid receptors; Corticosterone; Steroid metabolism; Intestinal maturation; 11 $\beta$ -Hydroxysteroid dehydrogenase; Carbenoxolone 98, 139
- Glutathione**; Aging; Glutathione peroxidase; superoxide dismutase; lipid peroxidation 98, 177
- Glutathione peroxidase**; Aging; Glutathione; superoxide dismutase; lipid peroxidation 98, 177
- Heart**; Free radicals; Mitochondria; Aging; Longevity; Hydrogen peroxide 98, 95
- Helicase**; Aging; Founder chromosome; Progeria; Werner syndrome 98, 255
- Human T cells**; Aging; Protein tyrosine kinases; T cell receptor signaling; Protein tyrosine phosphatases 98, 57
- Hydrogen peroxide**; Free radicals; Mitochondria; Aging; Longevity; Heart 98, 95
- 11 $\beta$ -Hydroxysteroid dehydrogenase**; Mineralocorticoid receptors; Glucocorticoid receptors; Corticosterone; Steroid metabolism; Intestinal maturation; Carbenoxolone 98, 139
- Interleukin-1 $\beta$** ; In vitro aging; Prostaglandin E<sub>2</sub>; *Campylobacter rectus*; Lipopolysaccharide; Fibroblasts 98, 75
- Intestinal maturation**; Mineralocorticoid receptors; Glucocorticoid receptors; Corticosterone; Steroid metabolism; 11 $\beta$ -Hydroxysteroid dehydrogenase; Carbenoxolone 98, 139
- In vitro aging**; Interleukin-1 $\beta$ ; Prostaglandin E<sub>2</sub>; *Campylobacter rectus*; Lipopolysaccharide; Fibroblasts 98, 75
- Kininogen**; Aging; Cysteine proteinase inhibitors; Rat liver 98, 151
- lipid peroxidation**; Aging; Glutathione; Glutathione peroxidase; superoxide dismutase 98, 177
- Lipopolysaccharide**; In vitro aging; Interleukin-1 $\beta$ ; Prostaglandin E<sub>2</sub>; *Campylobacter rectus*; Fibroblasts 98, 75
- Longevity**; Aging; Mortality rate; Very advanced age 98, 167
- Longevity**; Free radicals; Mitochondria; Aging; Heart; Hydrogen peroxide 98, 95
- Longevity**; Physiology; Age-retarding 98, 47
- Malondialdehyde**; Aging; Erythrocyte; Oxidative damage; Ca<sup>2+</sup>-ATPase; Chemiluminescence 98, 127
- Mineralocorticoid receptors**; Glucocorticoid receptors; Corticosterone; Steroid metabolism; Intestinal maturation; 11 $\beta$ -Hydroxysteroid dehydrogenase; Carbenoxolone 98, 139

- Mitochondria**; Free radicals; Aging; Longevity; Heart; Hydrogen peroxide 98, 95
- Mitochondrial DNA damage**; DNA repair; Transgenic mice; Quantitative extended-length PCR; Aging 98, 203
- Mortality rate**; Aging; Longevity; Very advanced age 98, 167
- Mouse**; Endocrine thymus; Aging impairment reversibility; Brain insulin receptors 98, 37
- Mutation**; Aging; Transgenic mice 98, 189
- Osteoblast**; Aging; Bone formation; Fibronectin; Oxygen free radical 98, 113
- Oxidative damage**; Aging; Erythrocyte; Malondialdehyde;  $\text{Ca}^{2+}$ -ATPase; Chemiluminescence 98, 127
- Oxygen free radical**; Aging; Osteoblast; Bone formation; Fibronectin 98, 113
- Phosphatidyl inositol 3-OH kinase (PI3K)**; *age-1*; Brain; *clk-1*; Signal transduction; Transcriptional silencer 98, 223
- Physiology**; Longevity; Age-retarding 98, 47
- Progeria**; Aging; Founder chromosome; Helicase; Werner syndrome 98, 255
- Progeroid syndrome**; Ageing; Chromosomal instability; DNA helicase; System; Werner's syndrome 98, 239
- Prostaglandin E<sub>2</sub>**; In vitro aging; Interleukin-1 $\beta$ ; *Campylobacter rectus*; Lipopolysaccharide; Fibroblasts 98, 75
- Protein tyrosine kinases**; Aging; Human T cells; T cell receptor signaling; Protein tyrosine phosphatases 98, 57
- Protein tyrosine phosphatases**; Aging; Human T cells; Protein tyrosine kinases; T cell receptor signaling 98, 57
- Quantitative extended-length PCR**; DNA repair; Transgenic mice; Mitochondrial DNA damage; Aging 98, 203
- Rat liver**; Kininogen; Aging; Cysteine proteinase inhibitors 98, 151
- Signal transduction**; *age-1*; Brain; *clk-1*; Phosphatidyl inositol 3-OH kinase (PI3K); Transcriptional silencer 98, 223
- Steroid metabolism**; Mineralocorticoid receptors; Glucocorticoid receptors; Corticosterone; Intestinal maturation; 11 $\beta$ -Hydroxysteroid dehydrogenase; Carbenoxolone 98, 139
- superoxide dismutase**; Aging; Glutathione; Glutathione peroxidase; lipid peroxidation 98, 177
- System**; Ageing; Chromosomal instability; DNA helicase; Progeroid syndrome; Werner's syndrome 98, 239
- T cell receptor signaling**; Aging; Human T cells; Protein tyrosine kinases; Protein tyrosine phosphatases 98, 57
- Transcriptional silencer**; *age-1*; Brain; *clk-1*; Phosphatidyl inositol 3-OH kinase (PI3K); Signal transduction 98, 223
- Transgenic mice**; Aging; Mutation 98, 189
- Transgenic mice**; DNA repair; Quantitative extended-length PCR; Mitochondrial DNA damage; Aging 98, 203
- Very advanced age**; Aging; Longevity; Mortality rate 98, 167
- Werner's syndrome**; Ageing; Chromosomal instability; DNA helicase; Progeroid syndrome; System 98, 239
- Werner syndrome**; Aging; Founder chromosome; Helicase; Progeria 98, 255
